

Daan Lemmens

Full Stack Developer

daan.lemmens@hotmail.com · Belgium · linkedin.com/in/daan-lemmens · github.com/LemmensDaan · lemmensdaan.github.io

PROFILE

Full stack developer with six years of experience, currently building a multi-tenant payroll and HR data platform on .NET, React and Azure. Comfortable across backend and frontend, with some cloud infrastructure experience, and at home with AI-assisted development. In my spare time I build web, game and hardware projects, from tabletop tools to a self-hosted e-ink dashboard.

EXPERIENCE

Full Stack Developer

Sep 2022 – present

Paybix · St-Katelijne-Waver (via ElmosExpert until Sep 2023, then permanent)

- Develop Epix, a multi-tenant payroll and HR data platform with integrations to payroll providers across Europe and the UK
- Main contributor to Epix's own API: C# / .NET, ASP.NET Core, EF Core on SQL Server, REST and GraphQL
- Built and maintained the API integrations with external payroll and HR systems
- Frontend in React and TypeScript in an Nx monorepo, with generated GraphQL clients
- Some hands-on experience with Azure infrastructure as code (Bicep) and Azure DevOps pipelines

IT Consultant

Sep 2022 – Sep 2023

ElmosExpert · Mechelen

- Placed at Paybix under a hire-to-hire arrangement; converted to a permanent contract after one year

Software Developer

Oct 2020 – Aug 2022

Contribute NV · Kontich

- Oracle APEX development for NBN (standards and customer management) and Sabam (project-management automation)
- Modernised the registration and online payment flow for walking federations (Cronolive)
- Manual and automated testing of a Petronas application

Intern, then Front End Developer

Oct 2019 – Apr 2020

Cumul.io · Leuven

- Built an Angular library that embeds dashboards in a few lines of code, now used by customers; wrote its tutorial and functional analysis
- Migrated large parts of the Cumul.io Academy from AngularJS to Angular

PROJECTS

- **SWN Builder** (swn-builder.pages.dev): web companion for the tabletop RPG Stars Without Number, with 3D procedural planets, PDF export and offline mode. React 19, TypeScript, Three.js, Cloudflare Pages.
- **Star Rogue**: FTL-style space roguelike with procedural star systems and custom shaders. Godot 4, GDScript. Work in progress.
- **Home dashboard (InkyPi)**: customised open-source e-ink dashboard on a Raspberry Pi, with a macro-pad controller daemon and a themed calendar plugin. Python.

SKILLS

Backend	C#, .NET, API design and integrations, ASP.NET Core, EF Core, SQL Server, GraphQL, Oracle APEX, PL/SQL, Java
Frontend	React, TypeScript, Angular, HTML, CSS, Three.js
Cloud	Azure, Bicep, Azure DevOps, Git
Other	Cypress, Jest, xUnit, Godot, Python, Raspberry Pi

EDUCATION

UC Leuven-Limburg, 2016 – 2020

Professional bachelor in Applied Computer Science, software development

Campus Groep T, Leuven, 2014 – 2016

Industrial Sciences (first years)

LANGUAGES

Dutch (native) · English (C2)

French (A2 listening and reading, A1 speaking and writing)

INTERESTS

Gaming, D&D and tabletop RPGs, music, hobby projects, running
