SKILLS

BACKEND

C# · .NET · ASP.NET Core · EF Core · SQL Server · REST & GraphQL · API design and integrations · Oracle APEX · PL/SQL · Java

FRONTEND

React · TypeScript · Angular · HTML · CSS · Three.js · Nx monorepo

CLOUD & OPS

Azure · Bicep (IaC) · Azure DevOps · CI/CD · Git

TESTING

xUnit · Jest · Cypress

OFF THE CLOCK

Godot · GDScript · GLSL · Python · Raspberry Pi

EDUCATION

UC Leuven-Limburg

2016 – 2020

Professional bachelor in Applied Computer Science, software development track

Campus Groep T, Leuven

2014 – 2016

Industrial Sciences, before switching to Applied Computer Science

LANGUAGES

Dutch (native) · English (C2) · French (basic)

VOLUNTEERING

Youth leader at Fanfare Sint-Dionysius Opoeteren, 2016 – 2023: an annual youth camp and activities through the year.

Company first aider, Red Cross Flanders (2019, expired).

OFF-DUTY

Gaming · D&D · TTRPGs · Space
Music · Hobby projects
Running

PROFILE

Full stack developer with six years of experience, currently building Epix, a multi-tenant payroll and HR data platform, on .NET, React and Azure. Integrations are where most of my time goes: implementing against payroll and HR providers across Europe and the UK, and supporting the external parties that consume our own API, customer calls included. Comfortable on both sides of the stack, with hands-on Azure infrastructure and pipeline work. I design and build with AI assistance, then review and test everything that lands. Evenings go to game, web and hardware projects.

EXPERIENCE

Full Stack Developer

Sep 2022 – present

Paybix · St-Katelijne-Waver

- Build Epix, a multi-tenant payroll and HR data platform with integrations to payroll providers across Europe and the UK
- Main contributor to the Epix API: C# and .NET, ASP.NET Core, EF Core on SQL Server, REST and GraphQL
- Most of the integration work runs through me, in both directions: implementing against external providers' APIs, and supporting the parties that consume ours, customer calls to clarify behaviour and chase bugs included
- Frontend in React and TypeScript in an Nx monorepo, with generated GraphQL clients
- Azure infrastructure as code in Bicep, with build and release pipelines in Azure DevOps
- Multi-tenant throughout: a feature has to hold up across customers on different providers and in different countries

IT Consultant

Sep 2022 – Sep 2023

ElmosExpert · Mechelen

- Placed at Paybix under a hire-to-hire arrangement; converted to a permanent contract after a year on the team

Software Developer

Oct 2020 – Aug 2022

Contribute NV · Kontich

- Oracle APEX development for NBN: standards and customer management applications
- Project-management automation for Sabam
- Modernised the registration and online payment flow for walking federations (Cronolive)
- Manual and automated testing of a Petronas application

Intern, then Front End Developer

Oct 2019 – Apr 2020

Cumul.io · Leuven

- Built an Angular library that embeds Cumul.io dashboards in a few lines of code, now used by customers, and wrote the tutorial and functional analysis shipped with it
- Migrated large parts of the Cumul.io Academy from AngularJS to Angular

PROJECTS

SWN Builder · [swm-builder.pages.dev](#)

Web companion for the tabletop RPG Stars Without Number: characters, ships and mechs, factions, sector and galaxy generation, a GM toolkit and PDF sheet export, with 3D procedural planets, offline PWA mode and Drive backup.

[React 19](#) · [TypeScript](#) · [Vite](#) · [Three.js](#) · [Zustand](#) · [Cloudflare Pages](#)

Star Rogue

FTL-style sector-crawl roguelike with faction wars and a spreading corruption. Seeded procedural star systems, with custom shaders for planets, nebulae and black holes. In progress.

[Godot 4](#) · [GDScript](#) · [GLSL shaders](#)

Home dashboard & media server

InkyPi, an open-source e-ink dashboard, on a Raspberry Pi beside my media server. My additions: a macro-pad and knob controller daemon that switches views, a themed calendar plugin and patches to existing ones.

[Python](#) · [InkyPi](#) · [Raspberry Pi](#) · [Jinja2](#)
